

**Product Name:**  
The Cannon

**Product Category:**  
Compact Lift Systems

**WLL:**  
75-250 kg

## OVERVIEW

The Cannon is a compact and ultra-lightweight lifting tool for installation professionals, offering impressive reach and wire-mounted flexibility — ideal for fast, precise, and agile placement of glass, window frames, and tiles. Thanks to its low weight, The Cannon can be carried by one person and fits easily into a small Caddy van.

## FEATURES & BENEFITS

### KEY FEATURES

Lifts up to 250 kg, compact design, fits in a small van, easy to transport and operate by one person, ideal for precise glass installation.

### BENEFITS

Lightweight and ergonomic design prevents back strain, enhances working comfort and joy, improves efficiency,

Weight	39 kg (cart) 19 kg (boom)
Maximum lifting height	2480 mm
Maximum reach	1150 mm
Working Load Limit	75 / 250 kg
Ballast	10 x 9 kg

## REASONS TO CHOOSE OUR PRODUCT

The Cannon is the ultimate lifting partner for glaziers, façade specialists and interior fitters. Its smart design combines low weight with exceptional power and flexibility. With a lifting capacity of 75 to 250 kg, it easily handles heavy (triple) glass, window frames, or floor tiles.

What truly sets The Cannon apart is its wire-mounted suction cup. Unlike fixed boom systems, this gives you full flexibility during installation — enabling faster, safer and more precise work. It's ideal for lifting from A-frames or trailers, and thanks to its nearly horizontal mast position, it's also perfect for laying heavy glass panels or tiles on floors.

We also supply the right lightweight suction lifters and glass trolleys to complete your setup. The Cannon is handcrafted in the Netherlands by skilled craftsmen with passion and precision.

## INSTRUCTIONS FOR USE

The cart is easy to operate: a strap winch with cordless drill adjusts the mast, a second winch lifts the load. Swivel wheels include brakes. Various demonstration videos are available on our website showing how to use The Cannon.
